**Career Objective** I am a Full Stack Software Engineer with a passion for building resilient code bases that offers the best of user experience and satisfaction. I have multiple years of experience building consumer facing software with a proficiency in Node, Typescript, Git, Linux, GraphQL and RESTful APIs.

**Major Skills**

- **Languages:** JavaScript, Typescript, Python, Php
- **Frameworks/Libraries:** NodeJs, ElectronJs, ReactJs, ReactNative, GraphQL (Apollo)
- **Databases:** MongoDb, Postgresql, Mysql
- **Testing:** Cypress (E2E), Jest
- **Others:** DOCKER, GIT

**Experience**

**FavDoctor**  
**Lead Full Stack Developer (Remote/Part-time) | Mar. 2020 - Present | Nigeria**

- Worked On An Health-Quiz Application Using React Native
- Led A Team of Developers on a Self-Diagnosis Health Application

**Stack: Typescript, Javascript, ReactNative, HTML, CSS**

**AcceleratorApp**  
**Backend Developer (Remote/Full-Time) | Aug 2019 - Mar. 2020 | Canada**

- I built a Zapier app with multiple endpoints that allowed clients to automate information retrieval from their profiles.
- I built a Google Authentication System that allowed users authenticate their login and registration process.
- I did extensive work on an event management system that allowed auto-matching of users based on time availability.
- and more...

**Stack: Typescript, Nodejs, MongoDB, Jest, Cypress**

**Radical Stack Limited**  
**Software Engineer (Remote/Full-Time) | Mar. 2019 - Jul. 2019 | UK**

- I built multiple blockchain-based Application Program Interfaces that made use of decentralized data in creating applications that needs high level of security and data immutability.

**Stack: Javascript, Nodejs, MongoDB, Posgresql, Mysql**

## **Bitmama.io**

**Backend Engineer (Remote/Full-Time) | Nov. 2018 - Mar. 2019 | Nigeria**

- I had the responsibility of working on the Nodejs/MongoDb/Redis Powered Codebase, which involved working on a direct-to-cash semi-matching engine for Cryptocurrency Trading.

**Stack: Javascript, Nodejs, MongoDB, Posgresql, AWS**

## **Utopian.io**

**Open Source Contributor | Jan. 2017 - Dec. 2018 | Nigeria**

- Made code contributions and wrote technical articles for open source projects
- Built Open Source tools for Graphene-Based Blockchain Projects

**Stack: PHP, HTML, CSS, Javascript, Nodejs**

## **Freelancing**

**Full Stack Web Developer | Jan. 2012 - Nov. 2018 | Nigeria**

- I worked on an In-Office Task Management System
- I built an app that helped to calculate the most profitable NASDAQ stock to buy (Short & Medium term) using their RSI indicator and Stochastic Index.
- I built a social network that had a profile, messaging and multi-featured news system
- and more..

**Stack: PHP, NodeJs, ReactJs, Laravel, AWS, HTML, CSS**

Projects/  
Experiments

## **Fashion Styles App**

- This Android App helps users pick from a gallery of fashion styles. It features about 400 pictures of fashion styles that get synced offline with the android app from a nodejs server, thus allowing the user to have offline access to fashion styles with or without internet connectivity.
- **Built With:** React Native, Typescript, NodeJs
- **Github Link:** [Fashion App Repo](#)

## **BlockChain Notifier**

- This script notifies a blockchain user of recent transactions happening on his Steem Blockchain Account. It is meant to help an crypto-exchange have a real time notification system of activities happening on their blockchain account.
- **Built With:** Javascript, NodeJs
- **Gitlab Link:** [Blockchain Notifier](#)

### Countdown Timer App

- This is a simple android app that allows a user have set up a time countdown. It features a sound alert that beeps close to the completion of the timer. It also has a feature that helps to speed up the timer twice or 1.5 times faster.
- ***Built With:*** React Native, Typescript
- ***Github Link:*** [Countdown App Repo](#)

### Social Network for Quote Lovers (Defunct)

- This website allowed users post quotes , like quotes, search quotes, create profiles , and automatically convert quotes to pictures using an algorithm based on PHP-GD library.
- ***Built With:*** PHP, HTML, JAVASCRIPT, MYSQL
- ***Github Link:*** [Social Network Repo](#)

## Education

**Bachelor of Engineering, Civil Engineering (2016)**  
Federal University of Technology, Akure
