Career Objective

I am a Full Stack Engineer with passion for building resilient code bases that offers the best of user experience. I have multiple years of experience building consumer facing software with a proficiency in Node, Typescript, Git, Linux, Graphql and RESTful APIs.

Major Skills

- **Languages:** Javascript, Typescript, Python, Php
- **Frameworks/Libraries:** NodeJs, ElectronJs, ReactJs, ReactNative, Graphql (Apollo), Redux, Flask e.t.c
- **Databases:** MongoDb, Postgresql, Mysql, e.t.c
- **Testing:** Cypress (E2E), Jest
- **Others:** DOCKER, GIT

Experience

AcceleratorApp
Software Engineer (Remote) | Aug 2019 - Mar. 2020 | Canada
- I built a Zapier app with multiple endpoints that allowed clients to automate information retrieval from their profiles.
- I built a Google Authentication System that allowed users authenticate their login and regisgtration process.
- I did extensive work on an event management system that allowed auto-matching of users based on time availability.
- and more...

Radical Stack Limited
Software Engineer (Remote) | Mar. 2019 - Jul. 2020 | UK
- I built multiple blockchain-based Application Program Interfaces that made use of decentralized data in creating applications that needs high level of security and data immutability.

Bitmama.io
Backend Engineer (Remote) | Nov. 2018 - Mar. 2019 | Nigeria
- I had the responsibility of working on the Nodejs/MongoDb/Redis Powered Codebase, which involved working on a direct-to-cash semi-matching engine for CryptoCurrency Trading.

Freelancing
Full Stack Web Developer | Jan. 2012 - Nov. 2018 | Nigeria
- I worked on an In-Office Task Management System
- I built an app that helped to calculate the most profitable NASDAQ stock to buy (Short & Medium term) using their RSI indicator and Stochastic Index.
- I built a social network that had a profile, messaging and multi-featured news system
- and more..

Education: Bachelor of Engineering, Civil Engineering (2016)
                  Federal University of Technology, Akure
